SUBJECT INDEX

α,ω-bis(alkylthio)alkanes
photochemical behaviour of α,ω-bis-(alkylthio)alkanes, 77
Anthracene
mechanistic studies on the photo-oxygenation of 1,1-diphenyl-2-vinylcyclopropane cosensitized by biphenyl and 9,10-dicyanoanthracene, 59
synthesis and spectral properties of Rose Bengal derivatives containing anthracene chromophores, 87

Benzophenone
study of the long-lived intermediate formed in the photoreduction of benzophenone by isopropyl alcohol, 27
Benzylic acid
chemically induced dynamic nuclear polarization in the photo-oxidation of benzylic acid with uranyl nitrate, 281
Biacetyl
spectroscopic study of the interactions of a nitrogen cold plasma extracted from the discharge with formaldehyde, glyoxal and biacetyl, 1
Biphenyl
mechanistic studies on the photo-oxygenation of 1,1-diphenyl-2-vinylcyclopropane cosensitized by biphenyl and 9,10-dicyanoanthracene, 59

Cadmium selenide
photoelectrochemical effect of CdSe electrodes produced by direct interaction of Cd and Se in organic solvents at high temperatures, 269
Carbon dioxide
the photolysis of CO at 193 nm in the liquid and gas phases, 159
Carbon suboxide
ultraviolet photodissociation dynamics of carbon suboxide, 139
Carotene
$S_2 \rightarrow S_0$ fluorescence and transient $S_n \leftarrow S_1$ absorption of all-*trans*-β-carotene in solid and liquid solutions, 315
Chromium
$HCrO_4$-photosensitized oxidation of tryptophan exposed to near-UV–visible light, 285
CIDNP
chemically induced dynamic nuclear polarization in the photo-oxidation of benzylic acid with uranyl nitrate, 281
Collision quenching
kinetics of partly diffusion controlled reactions XXII: competition between long-distance energy transfer and collision quenching — first results, 181
Coumarins
fluorescence properties and excited state interactions of 7-hydroxy-4-methylcoumarin laser dye, 379
triplet state of coumarin 153 studied by nanosecond pulse radiolysis, 239
Cyclohexane
photosensitized oxidation of *n*-butylcyclohexane as a model for photochemical degradation of *n*-alkylcyclohexanes in seawater, 347
Cyclopropane
mechanistic studies on the photo-oxygenation of 1,1-diphenyl-2-vinylcyclopropane consensitized by biphenyl and 9,10-dicyanoanthracene, 59

Decay dynamics
decay dynamics of the lowest triplet and lowest excited singlet states of thioacetaldehyde and thioacetone, 169
Degradation
photosensitized oxidation of *n*-butylcyclohexane as a model for photochemical degradation of *n*-alkylcyclohexanes in seawater, 347

© Elsevier Sequoia/Printed in The Netherlands

Diamino compounds
solvatochromic effects in the fluorescence of a few diamino aromatic compounds, 301
Diffusion controlled reactions
kinetics of partly diffusion controlled reactions XXII: competition between long-distance energy transfer and collision quenching — first results, 181
Disulphide radical anions
photochemistry of disulphide radical anions in the solid phase, 193

Electrodes
photoelectrochemical effect of CdSe electrodes produced by direct interaction of Cd and Se in organic solvents at high temperatures, 269
Electron transfer
novel photoinduced electron transfer reactions between naphthalene and triphenylsulphonium salts, 233

Formaldehyde
spectroscopic study of the interactions of a nitrogen cold plasma extracted from the discharge with formaldehyde, glyoxal and biacetyl, 1
Förster cycle
photodehydroxylation of methoxybenzyl alcohols: rate constants for solvent and hydronium ion catalyzed photodehydroxylation and applicability of Förster cycle calculations, 49

Glyoxal
spectroscopic study of the interactions of a nitrogen cold plasma extracted from the discharge with formaldehyde, glyoxal and biacetyl, 1

High temperatures
photoelectrochemical effect of CdSe electrodes produced by direct interaction of Cd and Se in organic solvents at high temperatures, 269

Intraligand photoreactions
intraligand photoreactions. I. Photochemistry of pentakis(methylisocyanide)(styrylpyridine)Ru^{II} tetrafluoroborate, 295

Isomerization
photosensitized *trans–cis* isomerization of stilbene in a pure polystyrene matrix, 113
Isopropyl alcohol
study of the long-lived intermediate formed in the photoreduction of benzophenone by isopropyl alcohol, 27

Ketones
light-induced polymer and polymerization reactions XXXIII: direct photoinitiation of methyl methacrylate polymerization by excited states of ketones, 253
Kinetic analysis
limitations to the kinetic analysis of thermoreversible photoreactions of photochromic systems, 15

Laser dyes
fluorescence properties and excited state interactions of 7-hydroxy-4-methylcoumarin laser dye, 379
Long-distance energy transfer
kinetics of partly diffusion controlled reactions XXII: competition between long-distance energy transfer and collision quenching — first results, 181

Merocyanine dye
photophysical behaviour of a simple merocyanine dye and its analytical implications, 99
Methoxybenzyl alcohols
photodehydroxylation of methoxybenzyl alcohols: rate constants for solvent and hydronium ion catalyzed photodehydroxylation and applicability of Förster cycle calculations, 49
Methyl methacrylate
light-induced polymer and polymerization reactions XXXIII: direct photoinitiation of methyl methacrylate polymerization by excited states of ketones, 253
Methyl violet
titanium dioxide catalysed photooxidation of methyl violet, 247

Naphthalene
novel photoinduced electron transfer

reactions between naphthalene and triphenylsulphonium salts, 233
1,8-Naphthalimide derivatives
solvent effects on the photophysical properties of *N*-substituted 1,8-naphthalimide derivatives, 323
Naphthoic acid
excited-state prototropism in 2-amino-3-naphthoic acid and its ester, 329
Nitrogen
spectroscopic study of the interactions of a nitrogen cold plasma extracted from the discharge with formaldehyde, glyoxal and biacetyl, 1

Photo-oxidation
chemically induced dynamic nuclear polarization in the photo-oxidation of benzylic acid with uranyl nitrate, 281
titanium dioxide catalysed photo-oxidation of methyl violet, 247
Photo-oxygenation
mechanistic studies on the photo-oxygenation of 1,1-diphenyl-2-vinylcyclopropane cosensitized by biphenyl and 9,10-dicyanoanthracene, 59
Photocatalysed reduction
the photocatalysed reduction of aqueous sodium carbonate using platinized titania, 367
Photochemical reduction
effect of aromatic molecules on the photochemical reduction of the uranyl ion with triphenylphosphine, 221
photochemical reduction of uranyl ion with trimethylphosphite and triethylphosphite, 213
Photochromic systems
limitations to the kinetic analysis of thermoreversible photoreactions of photochromic systems, 15
Photodehydroxylation
photodehydroxylation of methoxybenzyl alcohols: rate constants for solvent and hydronium ion catalyzed photodehydroxylation and applicability of Förster cycle calculations, 49
Photodissociation
ultraviolet photodissociation dynamics of carbon suboxide, 139
Photoinitiation
light-induced polymer and polymerization reactions XXXIII: direct photoinitiation of methyl methacrylate polymerization by excited states of ketones, 253
Photoreduction
study of the long-lived intermediate formed in the photoreduction of benzophenone by isopropyl alcohol, 27
Photosensitized oxidation
$HCrO_4$-photosensitized oxidation of tryptophan exposed to near-UV–visible light, 285
photosensitized oxidation of *n*-butylcyclohexane as a model for photochemical degradation of *n*-alkylcyclohexanes in seawater, 347
Plasma
spectroscopic study of the interactions of a nitrogen cold plasma extracted from the discharge with formaldehyde, glyoxal and biacetyl, 1
Platinized titania
the photocatalysed reduction of aqueous sodium carbonate using platinized titania, 367
Polyacrylates
sulphur-containing polyacrylates II: UV-induced polymerization of 2,2′-thiobisethanol dimethacrylate, 121
Polymerization
light-induced polymer and polymerization reactions XXXIII: direct photoinitiation of methyl methacrylate polymerization by excited states of ketones, 253
sulphur-containing polyacrylates II: UV-induced polymerization of 2,2′-thiobisethanol dimethacrylate, 121
Polystyrene
photosensitized *trans–cis* isomerization of stilbene in a pure polystyrene matrix, 113
Prototropism
excited-state prototropism in 2-amino-3-naphthoic acid and its ester, 329
Pulse radiolysis
triplet state of coumarin 153 studied by nanosecond pulse radiolysis, 239
Pyridines
quenching of the ZnTPP excited states by *para*-cyano-*N*-methylpyridine, 41

Pyridinium compounds
reversible photochemistry of 1-methyl-4-ethoxycarbonylpyridinium iodide, 357

Quenching
quenching of the ZnTPP excited states by *para*-cyano-*N*-methylpyridine, 41

Reductive elimination
photochemical reductive elimination of hexabromotellurate(IV), 227
Rose Bengal
synthesis and spectral properties of Rose Bengal derivatives containing anthracene chromophores, 87

Seawater
photosensitized oxidation of *n*-butylcyclohexane as a model for photochemical degradation of *n*-alkylcyclohexanes in seawater, 347
Solids
photochemistry of disulphide radical anions in the solid phase, 193
Solvatochromic effects
solvatochromic effects in the fluorescence of a few diamino aromatic compounds, 301
Solvent effects
solvent effects on the photophysical properties of *N*-substituted 1,8-naphthalimide derivatives, 323
Stilbene
photosensitized *trans–cis* isomerization of stilbene in a pure polystyrene matrix, 113
Sulphonium compounds
novel photoinduced electron transfer reactions between naphthalene and triphenylsulphonium salts, 233
Sulphur
sulphur-containing polyacrylates II: UV-induced polymerization of 2,2′-thiobisethanol dimethacrylate, 121

Tellurate
photochemical reductive elimination of hexabromotellurate(IV), 227
Thermoreversible photoreactions
limitations to the kinetic analysis of thermoreversible photoreactions of photochromic systems, 15
Thioacetaldehyde
decay dynamics of the lowest triplet and lowest excited singlet states of thioacetaldehyde and thioacetone, 169
Thioacetone
decay dynamics of the lowest triplet and lowest excited singlet states of thioacetaldehyde and thioacetone, 169
Titanium dioxide
titanium dioxide catalysed photo-oxidation of methyl violet, 247
Triethylphosphite
photochemical reduction of uranyl ion with trimethylphosphite and triethylphosphite, 213
Trimethylphosphite
photochemical reduction of uranyl ion with trimethylphosphite and triethylphosphite, 213
Triphenylphosphine
effect of aromatic molecules on the photochemical reduction of the uranyl ion with triphenylphosphine, 221
Tryptophan
$HCrO_4$-photosensitized oxidation of tryptophan exposed to near-UV–visible light, 285

Uranium
chemically induced dynamic nuclear polarization in the photo-oxidation of benzylic acid with uranyl nitrate, 281
effect of aromatic molecules on the photochemical reduction of the uranyl ion with triphenylphosphine, 221
photochemical reduction of uranyl ion with trimethylphosphite and triethylphosphite, 213

Zinc tetraphenylporphyrin
quenching of the ZnTPP excited states by *para*-cyano-*N*-methylpyridine, 41
